

***ITC Systems' netZtouch QBX 7800 is a sleek, touch screen device that acts as an Online Account based Copy Controller, Print Release Station, Attendance Reader, and MiniTill.***

## Overview

The netZtouch QBX 7800 has a 7.5" Color LCD touch screen and comes equipped with a magnetic swipe, contactless, or barcode card reader for authentication purposes. Communication security is enhanced with SSL certification over the network. Once the user is authenticated, the print or copy transaction is processed, charged for and logged. The print job is then released or the copy function enabled and the transaction balance displayed.

## Copy/Print

The netZtouch QBX 7800 boasts a very intuitive touch screen experience. The user logs in using their contactless, magnetic stripe, or bar-coded card. They can also log in by entering their username and password or netID. The touchscreen interface easily allows the user to switch between the print release and copier modes with the press of a button. The cost of each print/copy job is displayed and the user account balance updated in real time for every transaction mode.

netZcore PRINT, GoPrint and Papercut print software use the 7800 as print release stations. Compatible with all the major campus one-card solutions on the market today.

In copier mode, the user has the option to charge copies to different accounts, (i.e.) personal or departmental. Balances are displayed for copies made and net amount left on the account.

Acts as a TCP/IP switch between the wall, the netZtouch and the MFD.

## MiniTill

Great for those smaller venues that do not require a full fledged POS or Cash Register. Comes with the basic POS functionality; 26 PLUs, 4 media keys (Account, Meal Plan, Cash, Other), Receipt Printer with Cash Drawer output, VOID and Refund capabilities, One Touch transaction processing (breakfast, lunch, dinner, etc.). Reporting in the standard 'X' or 'Z' reports. All transactions processed and stored in the netZcore backend.

## Attendance

Checks credentials to authorize for attendance using all types of cards. It will display a "✓" for valid authorization and a "✗" for an invalid authorization. All authorized attendance is recorded in netZcore's backend database.

### Benefits

- Print Release Terminal for netZcore PRINT, GoPrint and PaperCut Print Software
- Fully integrated with the netZcore Commerce Solution
- Pay for Print and Copy Terminal
- Settings configured or firmware upgrades flashed remotely via TCP/IP using Remote Config Software
- Supports SSL encrypted communication
- Intuitive touch screen user interface
- Streamlines cost recovery

### Applications

- Public and Academic Libraries
- University & College Campuses
- Real Estate & Law Offices
- Copy and Print Centers
- Corporations
- Government Record Offices
- Court House
- Attendance
- Print Release
