

ITC Systems' Loaders are a key component to your cashless revenue system. Dispenses cards as well as add value to your accounts or cards with these powerful 24-hour cashiers.

Overview

ITC Systems designs and manufactures a powerful and durable touch screen enabled Account and Card Loaders. Due to the minimal operator assistance required, these card handling systems are ideal for use in busy locations where staff time is at a premium and self-service is a requirement.

Account & Card Loaders

ITC Systems' model 7880 Loader is used to add value to user accounts over a network via TCP/IP. It can be configured to accept any combination of coins, bills, or credit/debit cards to dispense cards and add value to a user's account or stored value card.

The 7880 Loader accepts multiple user card formats such as magnetic stripe, contactless, prox, barcoded and stored value magnetic stripe cards. These Loaders have options for a card dispenser, receipt printer, high security lock, alarm, and base.

Credit/debit card acceptance is achieved using an integrated credit card modem.

Transfer funds from one account to another through netZcore and also check your transactions or change a PIN.
