Vending and laundry solution

Attendance, parking and access control

Online account management

Outstanding reporting functionality

Applications

Universities

Colleges

K-12

Private School

Government Offices

Military Bases

Corporations

net core Avro

Simplifies transaction management and user credentials across campus, local merchants, and other closed environments for a total end to end cashless solution.

netZcore Avro secures all data, including data at rest. With netZcore ATH, all transactions from terminals and point of sale (POS) systems are secured and aggregated in the cloud and delivered to the netZcore Avro engine for processing. This new platform allows for the tightening of restrictions at the firewall level.

netZcore Avro offers seamless access to account based funds and facilitates purchases in over the counter Point of Sale (POS) and Unattended Point of Sale (UPOS) locations.

netZcore Avro allows applications and account options for each individual profile group and user. These options include meal plans, vending, copy/ print services, laundry services, parking, retail purchases, remote value loading and more.

netZore Avro delivers unparalleled cost savings by managing the entire system in the cloud. Coupled with our per user / per year pricing model, the total cost of ownership is greatly reduced. Smaller sites that could not justify on site servers now can take advantage of the powerful **netZcore** platform at an affordable rate. Larger multi-site implementations can now leverage user credentials system wide.

netZcore Avro offers the highest SLA for cloud-based services. Coupled with geographically redundant data storage, rest assured your data is secure and always available.

Your ITC Systems' consultant will help you choose the perfect commerce solution for your institution's needs and work with you to customize your system to meet those needs.
