

A secure, cashless vending solution that provides streamlined cash flow while offering patrons convenience and simplicity.

Functionality

ITC Systems' Vending Terminals enable the use of a vending machine through an encoded magnetic stripe card, contactless card, or bar coded card. The value of the purchase is deducted from the account the card is linked to and the product is dispensed.

Each reader fits into the standard bill validator cut-out found in most MDB vending machines.

Vending Terminal

The netZcom series Vending Terminal uses an ABA magnetic stripe card that can also be a credit card or other card media to pay for goods and services.

Features

- ✓ Streamlines cash flow
- ✓ Convenient for user, no more cashing coinage
- ✓ Vending Terminals blend seamlessly with existing ITC Systems solutions
- ✓ Some funds encoded on cards/accounts may never be used
- ✓ Card Loaders centralize the collection of cash and dispensing of cards
- ✓ Multiple card types accepted

netZcom Online Vending Terminal
